DETAILED ACTION

Allowance

1. **Claim(s) 1-10** are allowed.

2. The following is an examiner's statement of reasons for allowance:

Regarding **claim(s) 1-10**, the prior art of record fails to suggest or disclose a control section adapted to read out the data displayed and the audio data corresponding to a selected audio output from the audio memory when each of the mode selecting keys is depressed while a predetermined audio output mode is selected to control the data read out from the data memory and the audio data read out from the audio memory so that the audio data is outputted as voice.

It is not obvious to modify Bottum adding the claim control section described above because the transmitting of audio data packets of Bottum is stored in the mobile radio temporarily before being converted the audio data to a voice signal and not from request to read out data display.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
